

Sexual Assault Program

A Success Story

A lady started with the sexual assault program in June 2009. She could not look at the people that she was talking to, could barely be heard when talking, and had to have a bucket beside her the entire time as she felt extremely nauseous. The woman was severely sexually and physically abused as a child and recent medical issues have triggered flashbacks and nightmares. She has been unable to leave her home or even talk to people on the phone for about a year, however she has since attended the Healing the Hurt group, is volunteering, went to several social gatherings, and has called the sexual assault line when she needs to talk. We are very proud of the steps she has made and continues to make. Without the financial support from UNITED WAY the Sexual Assault program would not have been able to make a difference in this woman's life
